

# Attached-lid totes

Model comparison and sample checks for moving, rental and distribution projects.

## ZCP009

500 container with lid

**540 × 360 × 295 mm**

## ZCP010

560 container with lid

**600 × 400 × 315 mm**

Catalogue dimensions, in listed order. These are not confirmed usable internal dimensions. Photographs show example colours.

---

## Check the sample against your operation

### Usable space

Check internal length, width and depth with the lid closed against the largest item you need to pack.

### Handling & stacking

Confirm payload and loaded stacking limits in writing for the intended conditions. Check lid closure, handholds and the empty nesting arrangement.

### Dolly & branding

Confirm the dolly model, platform size, load rating and tote fit. Review logo artwork, placement and a print sample if required.

---

## Prepare a comparable quote

Send the catalogue model or exact product link, tote and dolly quantities, sample needs, delivery country/city/postal code and required date. Ask for the configuration, packing, freight and shipping terms to be itemised.

A store listing named “560” is not by itself proof that it is ZCP010. Confirm the model and configuration before ordering.
